PROFILE

- Cybersecurity Analyst with experience in threat detection, risk mitigation, and IT security compliance, supported by a background in operations and customer facing roles.
- Sales professional with a track record in financial services and client advisory, now applying that experience to communicate and position cybersecurity solutions effectively.
- Fully fluent in English and Spanish, detail oriented, and solution driven with a strong analytical mindset.
- Actively building expertise in blockchain security, with a focus on smart contract vulnerabilities and DeFi risk analysis.

SKILLS

- Network Configuration & Troubleshooting
- Physical Security Systems (CCTV/DVR/NVR)
- Linux (Administration, scripting, and offensive security tools)
- IT Documentation & Compliance
- SIEM/Monitoring Tools (Wazuh, Splunk)
- Malware Analysis (Python)

PROJECTS

Linux Log Analysis with Splunk

As a SOC Analyst configured centralized log collection and analysis using Splunk on Linux systems to detect suspicious activity.

- Installed Splunk Universal Forwarder on Ubuntu/Kali machines
- Forwarded logs from auth, syslog, and Apache access logs
- Created SPL queries to identify failed logins, root actions, and port scans
- Set alerts for brute-force attempts.

Vulnerability Assessment

Conducted vulnerability scans and analysis using industry tools to identify risks and recommend remediations.

- Scanned target systems using Nmap, Nessus Essentials, and OpenVAS
- Detected outdated software, weak encryption, and misconfigurations
- Assessed severity using CVSS scores and prioritized risks
- Proposed remediation steps based on urgency and best practices

Web Application Penetration Testing

Performed offensive security testing on vulnerable web applications through established security frameworks.

- Conducted reconnaissance and scanning using OSINT and active tools
- Exploited vulnerabilities such as SQLi, XSS, and broken authentication
- Delivered a professional report with risk ratings and remediation steps

Ransomware Development Lab (Python)

Built and analyzed a proof of concept ransomware in an isolated VM to understand encryption behavior and defensive detection.

- Implemented file level encryption using Fernet and generated a separate key file
- Created a custom decryptor requiring a passphrase to restore data
- Tested file encryption/decryption behavior on controlled sample files
- Documented attacker workflow, key handling, and defensive insights

RELEVANT WORK EXPERIENCE

Web Security & Network Support English Bay Bike Rentals (Vancouver, BC)	July 2025 - to present
- Conducted a website vulnerability assessment and delivered remediation recommendations. - Installed and configured CCTV systems to enhance physical security. - Optimized company network infrastructure, while also assisting with e-bike repairs and maintenance as needed.	
AV & Security Camera Technician Wynntek Installations (Vancouver, BC)	Jan 2022- May 2023
- Installed, mounted, and configured surveillance cameras and DVR/NVR systems for optimal coverage and remote network access. - Mounted TVs and installed audio/sound equipment for residential and commercial clients.	
IT Support CFHAGS S.A (México)	July 2018 - Nov 2021
- Managed and supported 300+ iPads (20 per classroom) across 15-20 classrooms, plus the school's Sistema UNO digital learning platform (projectors, classroom tech). - Administered school network (WiFi, user accounts) and maintained computer lab equipment. - Coordinated with platform providers for technical issues and system updates.	

PAST CAREER EXPERIENCES

Loan Advisor Spring Financial Inc. (Canada)	Oct 2024 - Feb 2025
Store Manager Cloud Ebikes (Canada)	Nov 2021 - Sep 2024
Database Assistant DA Comp (Mexico)	Jan 2012 - Jan 2013

CERTIFICATIONS

CompTIA Security+ (SY0-701) CompTIA	2026
---------------------------------------	------

EDUCATION

Cybersecurity Analyst Diploma Cornerstone Community College (Vancouver, BC)	2025
<i>(Cybersecurity Fundamentals, Network Defender, Certified Ethical Hacker, Penetration Testing Professional)</i>	
Bachelor of Science Autonomous University of Aguascalientes (Mexico)	2017
IT Technician (CBtis 168)(Mexico)	2012
